Our First Science Club Meeting:

Saturday, October 6th

3-5pm

VCS Gymnasium

3045 Garfield Avenue Carmichael, CA 95608

Topic: **Forensic Science**

Lead Organizer: Michelle Faust

The goal of the monthly science club is to give your family an introduction to and a taste of some of the diverse and exciting fields of science and also to provide information and connections to experts in their fields who can further guide you in your scientific education. The club is not meant to be a substitute or a replacement for your regular science curriculum and studies, but is to be treated as an opportunity to expand learning beyond standard coursework and to be a launching point for in-depth self-study at home. Because science is a challenging and somewhat intimidating subject, my hope is that these meetings, seminars and field trips will help de-mystify science and make it less scary and more fun for everyone. My desire is this website and the club meetings will aid you in a fun and exciting journey into the world of God's amazing Creation.

Aimee M. Bryan
Science Club Core Team Director
